Created with a conscience, Quest is a continuation of our partnership with the SEAQUAL Initiative to combat marine plastic pollution. Waste made wonderful, this lightly textured textile is woven entirely from post-consumer recycled plastic - transforming this most resilient of materials into a fabric as fluid as the waves by which it was inspired, and which it seeks to save. With a balanced hopsack weave enhanced by discat-dyed SEAQUAL yarn, Quest brings a touch of the ocean's natural beauty to commercial interiors.

## **A multi-application textile**

Simple in its aesthetic, Quest has been impeccably coloured to create a subtle two-tone weave detail - with a softly blended colouration and striated weft, this visual detail is understated, yet casually elegant. Acoustically transparent, fluid in drape and light in weight, this versatile textile is perfect for both task and soft seating, and ideal for use on panels.

## **Shades of the ocean**

Capturing the depth and breadth of the seasonal shorescape, each of the 27 colourways has been as carefully considered as an artist's paint stroke. From the sparkling blue of a summer's sea and fresh green of springtime flora to the golden ochre of an autumn sun's rays and cold grey of a winter's beachside cliff, the Quest shade selection is filled with evocative, authentic colour.

Inspired by Quest, contemporary coastal painter Maggie Cochran has created a custom piece of art which pays homage to the fabric's palette - capturing its redolent, authentic colour on canvas.

## **Taking back to give back**

Contributing to reducing marine plastic pollution in a tangible way, each metre of Quest contains the equivalent of 23 plastic bottles. To further assist in the fight against plastic waste, we make a give-back donation directly to the SEAQUAL Initiative for every metre of fabric sold to support their work in cleaning our oceans.

## **At a glance**

- **Woven entirely from recycled plastic waste, taken from both land and sea**
- **Includes 75% SEAQUAL yarn**
- **Available in 27 colourways**
- **Subtle, two-tone weave detail**
- **A multi-application and acoustically transparent fabric, suitable for upholstery and panel**
